FOR ALL LIQUIDS:

IWV 80

- ❶ Compact wet vacuum for many industrial applications.
- ❷ Safety cut-out when the container is full.
- ❸ Controlled emptying with drain hose.
- ❹ Two individually switchable bypass suction motors.
- ❺ Made of robust, epoxy-coated steel. Non-marking rollers and locking brake for safety and comfort while emptying.

Bypass motors

With the bypass motor, the suction air flow is not also used to cool the motor. The motor is cooled with a separate air flow. This stops the motor overheating when cleaning hot dusts for example.

Applications:
For various wet applications in
virtually all industrial sectors
